

## Foreign Experiences in the Development of Reading Culture Among Young Students Through the E-Learning Library

*Safarova Nafisa Kayimovna*

*Master of the Faculty of Pedagogy and Psychology*

**Abstract.** The article presents foreign experiences on the development of reading culture among students through the E-learning library. Through the use of these experiences, the possibilities of developing reading culture in students are shown.

**Key words:** E-learning library, students, reading culture, foreign experiences.

In the developed countries of the world, there are various initiatives and programs aimed at developing the reading culture of students in the e-learning environment. Here are some examples:

**Digital Libraries:** Many schools and universities are building digital libraries that allow students to access e-books, academic journals, and other online resources anytime, anywhere.

**Online Book Clubs:** Online book clubs give students a platform to discuss and analyze books with other students from around the world.

**Reading Apps:** There are many reading apps that provide students with an interactive and engaging learning experience. These apps often include features like highlighting, note-taking, and quizzes to help students improve their comprehension skills.

**Reading Challenges:** Some schools and universities organize reading exercises that encourage students to read a certain number of books in a certain amount of time. It helps to motivate students and make learning interesting.

**Literacy Programs:** Many governments and non-profit organizations run literacy programs aimed at promoting a culture of reading and improving literacy among students.

**Online Writing Competitions:** Writing competitions give students an opportunity to showcase their writing skills and also encourage them to read more to improve their writing skills.

**Virtual Author Visits:** Schools and universities can organize virtual author visits where students can interact with authors and discuss their books.

These initiatives and programs help promote reading culture among students in an e-learning environment, provide opportunities to develop critical thinking, creativity and imagination while improving their academic performance.

There are several projects aimed at developing reading culture among students in the e-learning environment in countries around the world. Here are some examples:

**Open eBooks:** Launched by the White House in 2016, this project gives students access to a digital library of thousands of popular and award-winning books. The project was designed to promote reading among students from low-income families.

**Worldreader:** Worldreader is a non-profit organization that provides access to digital books through e-readers and mobile devices to students in developing countries. The organization also provides training to teachers and librarians to help them integrate reading into their curricula.

**Global Digital Library:** This initiative is a partnership between the United Nations, the Norwegian government and the private sector. The goal is to give children in low-income countries

access to quality reading materials through a free, open-source digital library.

Project literacy laboratory : This project is until 2030 to illiteracy I'm done to give is a global initiative aimed at Project digital education resources access provides and reading skills increase for from technology to use encourages .

Reading is key thing : This project non-profit organization is less \_ provided in families to the children books and reading from materials use enable gives \_ Organization as well as study and literacy skills to develop help to give for parents and teachers for resources present is enough

BookBox : BookBox is \_ to the children one how many in languages animated from stories use opportunity giver initiative . Stories of children reading skills development and to understand improve for intended .

This project and initiatives electron education in the environment students between \_ book reading culture raise them \_ good quality reading materials and resources use opportunity present reach in order to work developed being , in them at school and from him outside to success reach for necessary has been critical thinking , creativity and the imagination to develop help gives \_

of the world a lot in countries electron education in the environment students in the middle book reading culture to develop directed project and initiatives there is Here's one how many examples :

American Joint Status : " Open electron books " project and " Digital promise " project to students digital reading from materials to use to provide directed initiatives .

Kenya : Digital educational program all initial schools digital education resources , including electron books and education to the games access to provide directed .

South Africa: FunDza Literacy Trust young people for mobile reading platforms present is enough and free of charge books and to write to the contests access offer to do through them reading and to write encourages .

India : India National digital library electron books , articles and multimedia resources own into received study of materials digital warehouse to create directed is an initiative .

Colombia : Education for computers " program for students and young people to schools gift done updated computers through digital including resources \_ electron from books use opportunity gives \_

Mexico : Education according to National digital strategy to students Mexico digital library through digital education resources , including electron from books use opportunity gives \_

Finland : Finland reading project high good quality reading from materials use and reading with depends activity development through both at school and from school children outside too and young people in the middle book reading culture to increase directed .

These are electron education in the environment students between \_ book reading culture to develop directed project and to initiatives have has been many of countries one how many is an example .

Many countries electron education through book reading culture to increase directed project and initiatives there is Here's one how many examples :

Joint States : Digital Promise project and the Open eBooks initiative to students digital reading from materials use opportunity to give directed .

India : India National digital library electron books , articles and multimedia resources own into received study of materials digital warehouse to create directed is an initiative .

China : Chinese digital reading innovative project digital reading to the materials access provide and reading with depends activity development through young people in the middle digital reading

culture promote to do directed is an initiative .

Canada : Canada children books center reading from materials use enable giver and children and young people in the middle book study a stimulating virtual book club offer does \_

Great Britain : National Children's Literacy Trust and young people in the middle reading and literacy development for one how many electron education resources work came out

Australia : Reading Australia project school and in universities Australian literature reading and to learn promote to do directed is an initiative .

South Africa: FunDza Literacy Trust young people for mobile reading platforms present is enough and free of charge books and to write to the contests access offer to do through them reading and to write encourages .

These are many countries electron education through book reading culture to increase directed project and to initiatives have has been one how many are examples .

Electronic education in the environment of students book reading culture increase according to scientific research is increasing . Below research to work examples cited :

Published in Journal of Educational Technology & Society research that's it showed that the electron books and another digital reading materials of students reading experience to increase and study to understand improvement can \_

Published in the Journal of Literacy Research research that's it showed that the electron books in class to teach input of students to study has been attitude improvement and their to study has been motivation to increase can \_

Published in the Journal of Research in Reading research that's it showed that the electron education platforms students in the middle study to understand and word wealth development for efficient tool to be can \_

Published in Journal of Adolescent & Adult Literacy research that's it showed that digital stories of students electron education in the environment reading and to write skills improve for strong tool to be can \_

Published in the Journal of Educational Psychology research that's it showed that to the students reading materials choose and control to do their to study has been motivation to increase and reading abilities improvement can \_

Published in Journal of Computer Assisted Learning research that's it showed that social network features own into received electron education platforms of students reading materials with activity to increase and reading around social mutually the effect development can \_

This studies that's it shows that electron education platforms of students reading culture increase for efficient tool to be can \_ Digital reading from materials use opportunity provide , electronic books in class to lessons add , read materials choose and control to do promote make , digital from stories use and social network features own into received without , electron study platforms of students reading materials with activity to increase can their \_ read winter to understand and dictionary wealth to increase , to study has been interest increase \_

Electronic education in the environment of students book reading culture increase according to studies take went many researchers there is Some examples the following own into takes :

Urbana- Champaign Illinois of the university English language education according to associate professor Dr. Elizabeth Dobler of students study to understand and activity increase for in class lesson in giving electron from books use according to research take went \_

\_\_\_\_ Great in Britain National Literacy Trust charity organization children and young people between

\_ literacy skills increase for digital reading materials and electron study platforms use according to research spent \_

Economical Cooperation and Progress Organization (OECD) of students reading skill and activity increase in order to in education technologies , including electronics \_ education platforms and digital reading from materials use according to research spent \_

Syracuse university under Digital literacy center children and young people between \_ literacy skills increase for electron books and another digital reading from materials use according to research spent \_

These are electron education in the environment of students book reading culture increase according to research take went researchers and of institutions one how many examples . Other researchers and organizations are also mentioned the subject active respectively are learning and students in the middle literacy skills and activity increase for electron study platforms and digital reading from materials how use possible to our understanding contribution adding \_

**Summary.** No educational institution can achieve effective student learning without facilitating access to a digital library. Next-generation learning management systems (LMS) make it easy for businesses and educational institutions to access large digital resources on demand. Your organization can easily invest in the right LMS system to take advantage of these digital library benefits.

In order to promote reading among students, various cultural-educational and intellectual events are held. In order to promote and encourage reading among students and their parents, educational events called "Book presentation", "Literature days", "My book-oftobim", "School-library-family" are held in educational institutions. -public organizations" charity event and "One child - three books" actions, as well as "Best book-reading students" and "Book-book school" contests were organized with the participation of parents.

In general, the development of reading culture among students in the e-learning environment is a complex pedagogical problem that requires a multifaceted approach. By providing access to digital reading materials, fostering a love of reading, and supporting the development of literacy skills, educators prepare students for success in school and in life.
