

## Modern Innovative Methods of Today's Youth In English Teaching

*Ibragimova Shoiray Sayfulla qizi*  
*Jizzakh is a teacher of the 3rd school of the city*

**Abstract:** In the thesis, information is provided to the students about the methods of using modern methods for the youth of today's English language classes.

**Key words:** Modern, youth, method, traditional, problematic approach..

### Introduction

**Grammatical error.** Today, the ability to know foreign languages is becoming one of the integral parts of professional education. Due to the high rate of cooperation with foreign partners among specialists in various fields, there is a high demand for them to learn the language. In modern society, foreign languages are becoming an important component of professional education. Today, there are large collections of educational materials for people with different levels of language skills. Success in achieving this goal depends on the practical methods and skills of teachers. The ability to use information technologies and modern teaching methods helps to quickly understand new materials. By combining different methods, the teacher is able to solve specific educational programs. The use of several methods of teaching and learning will give effective results. Teaching is carried out in small steps and is based on the student's existing knowledge system. As time progresses, innovations in every field are increasing. Different styles are also emerging in language teaching. A step-by-step approach to teaching English based on the learner's potential, level, and age gives good results. In this case, students are divided into groups based on teaching at the primary level, teaching at the middle level, and teaching at the higher level. A special program is developed by the teacher for each stage. At the initial stage, important attention is paid to pronunciation. At the beginning of the learning process, the teacher should focus on the student's pronunciation. While grammar and vocabulary are key, it's all for naught if the speaker's pronunciation is incorrect. Native speakers can understand speech even with grammatical errors if the speaker pronounces the words correctly. Therefore, in teaching, the main focus is on pronunciation. In this case, using different audios of native speakers gives good results. The teacher should teach the correct pronunciation of letters and words during the lesson. Also, at the initial stage, much attention is paid to oral speech and the development of reading techniques. If we consider the types of speech activities of teaching a foreign language, it is necessary to perform the following tasks when teaching them:

- a) Creating a reading mechanism;
- b) Developing oral reading techniques;
- c) Teaching to understand what he has read.

The role of modern technology in language learning and teaching is incomparable. The use of technological tools is used in every aspect of learning a foreign language (reading, writing, listening

and speaking). For example, in order to listen and understand, of course, this process cannot be carried out without a computer, player, CD discs. Listening comprehension is one of the most important parts of language learning. At the same time, the reader is required to pay attention to the speaker's pronunciation, compliance with grammatical rules, vocabulary and its meanings. When using modern technologies in the educational process, it is important for students to know information and communication technologies well and be able to use them. Teaching and learning a foreign language using modern technologies is one of the most effective ways. In this process, including: - using computers, the student can watch and listen to foreign language video clips, demonstrations, dialogues, movies or cartoons; - it is possible to listen and watch foreign language radio broadcasts and television programs; - CD players can be used. The use of these technical tools makes the process of learning a foreign language more interesting and effective for students. Today, teaching through interactive games is becoming a tradition in schools. It is known that the lesson is conducted on the basis of various games, which ensures that students demonstrate their capabilities, concentrate, improve their knowledge and skills, and become stronger. The basis of the use of game technology is the activity that activates and accelerates the student. To apply this method of "Creative Problem Solving", the beginning of the story is read and the end is referred to the judgment of the students; - "Merry Riddles" teaching riddles to students is important in teaching English, they learn unfamiliar words and find answers to riddles; - "Quick answers" helps to improve the effectiveness of the lesson; - Chigil yazdi ("Warm-up exercises") use various games in the classroom to make students interested in the lesson - "Pantomime" is a method in which very difficult topics need to be explained or written exercises are performed and students can be used when tired; - "A chain story" method helps students to develop oral speech; By using question-answer exercises, the student's speech can be strengthened, his memory improved, and repetition results are achieved. New words from the texts are memorized. As a result of question-answering, the repetition of those words in memory and the ability to use them in speech are formed. In addition, the organization of various games in the lessons increases the student's interest in learning the language and increases the pace of learning. In the "Hot Ball" game, students form a circle and throw the ball to each other, saying one of the new words. Participants do not repeat each other's words, they are removed from the game if they repeat or stop. In this way, the game continues. In the middle stage, grammar is taught in depth compared to the first stage, students are given exercises and tests to test their knowledge based on the learned grammar rules. Language teaching programs on computers and phones are also a good help for language teaching at the primary and secondary levels. Talk (English speaking practice), Daily English, Learn English (English master), How to speak real English we can take examples like These programs are structured in such a way that they include reading, listening, and test sections. Another good way to practice is to record the new words you have learned and listen to them in your spare time. In addition, showing more movies and cartoons with subtitles in English is also an effective way to teach the language. Sufficient attention should be paid to the formation of speech skills and the development of social flexibility in the trainings conducted during the educational process. In addition, the success of each lesson in education largely depends on the correct organization of the training. The lesson should be based on the creative cooperation of the teacher and the student. Only then will students be able to think independently and will be educated.
