

## Education is the Golden Jewel of the Heart, And Man is its Eternal Jewel

**Shomurotova Oydinoy**

*Faculty of History, Urganch State University, Student of group 202*

**Abstract:** The happiness of any nation depends on the peace and happiness of the state on the good experience of the youth.

**Keywords:** education, talent, happy life, society, family.

Virtue in a person is like a child, it should be carefully preserved and improved. Every person should learn to educate himself. The greatness of a person is determined by having the power to control and educate himself. Abdulla Awlani wrote: To educate a child for his health and well-being is to keep the body clean, to correct the profession from a young age, to teach good manners and to protect them from bad manners. But the main key to our good behavior is education. The happiness of every nation depends on the good experience of young people. The parents are responsible for the education of their children, and the school only acts as an assistant. everyone knows how to bring. The virtue in a person is like a child, it should be nurtured. Every person should first look in the mirror to educate himself. In the mirror, a person sees his own reflection. It was narrated by Abu Hurairah we read in the translation of the meaning of the hadith scarf: The Messenger of Allah, peace and blessings be upon him, said: Every believer is the mirror of his brothers. Do we see the evil of envy and jealousy in each of our brothers? All of us are people who are standing in the exam that is entrusted to us. We are the people who are responsible for the fate of your children, from the farthest point of the cells to every particle of the body. If we think about what the basics of education are: a person is a person because he is a person and he is a person, and education needs 3 things: talent, knowledge and practice. Education is bad for an incompetent person, don't spoil your education by spoiling it, don't waste your education on it. Education given to a capable person is as valuable as a jewel. he must educate, control his passion, abandon bad habits, direct scientific achievements to the benefit of humanity. Otherwise, he may go astray. Educating and advising is a responsibility. Because this is a duty. It was ordered by Allah Yolo. Our people certainly did not say such a saying in vain: it is not easy to become a scientist, it is not difficult to become a person. After receiving adab education, a person can reach the level of a truly perfect human being. In conclusion let me say: education is the ability to embody all the abilities of human nature in a dignified and beautiful manner, to show good qualities in the school of real life that always leads a person to good goals It is one of our most important priority tasks to educate enthusiastic and selfless young people who are good for the people. The work we do should be done beautifully, and the buildings should be in the most beautiful and charming surroundings. It is necessary that the monuments we built should not be damaged or destroyed, they should be eternal and beautiful, in other words, to make everything beautiful and perfect, to do it at the highest level of quality, to be given a good upbringing for a successful performance. It is necessary. The thinker and scientist Abu Nasr Farabi said that the main task of education is to educate a mature person who can respond to the demands of society and serve this society. We must educate ourselves. For this, we need to talk more with our youth, listen to their hearts, understand their pain, and give them practical help to solve their problems. We consider it our primary task to improve the activity of all the links of the educational system based on the requirements of today's times. The views and ideas put forward by Eastern thinkers are still important in the minds and hearts of young people as an educational manga.

As education begins with the family, we are a spiritual fortress that ensures our children's happiness, maturity, acceptance, becoming a great person, eternity of life, continuity of generations. As we want our family to be strong in the future, it is important to pay attention to all types of upbringing, making our children healthy and well-rounded in the family. role has its own character and appearance. In fact, when studying educational values, we should pay special attention to the possibilities of the educational system. Pedagogical market research has important practical value. In their works, they expressed their views on personal spirituality, creating high examples of human decency, family, marriage, raising children, making a living with honest work, and having a reasonable attitude to the environment. Thus, Eastern thinkers and scholars in their works on the issues of man and his education glorify the high spiritual and moral qualities of a person in acquiring knowledge and mastering a craft and invite everyone to acquire such qualities. Spiritually high, modern science No external power, idea or ideology can influence the generation that has acquired the rich spiritual heritage of our ancestors. The future of the nation is bright and bright. Let's educate our children in such a way that they grow up to be loyal people to their ancestors, their history, nation, religion and traditions. A polite, knowledgeable, hard-working, faith-believing child is the greatest wealth of the whole society and parents. If a person acquires good behavior, good habits and intelligence during the process of education, he will understand the lessons of life well and deeply. Only then. He does good deeds. If he has a vital deficiency and life skills, he commits to bad deeds. The earlier child education starts, the more effective and easier the result will be.
